Art Unit: 2833

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13, 14, 16-22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harshberger et al 5311397.

Harshberger et al substantially discloses the claimed invention, including first and second devices latched together, the act of latching/unlatching serving to activate/deactivate a switch. Any differences between Harshberger et al and the claimed subject matter are deemed to be obvious matters of design lacking criticality.

Claims 15 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of record, particularly the applied art, discloses or teaches the pin and hole, nor the specific testing steps, in combination with the rest of the subject matter of the respective independent claim.

The other references cited on Form 892 disclose similar modular connections.
